

**SOLUTION**

The Biamp TesiraFORTE family of digital signal processors offers the perfect platform for all audio conferencing needs.

The Beyerdynamic Bm32 microphone connects to 8 of the 12 acoustic echo cancellation inputs of the TesiraFORTE AVB VT to offer full duplex audio conferencing facilities for your telecon and VC needs.

Two in-table pop-ups provide VGA+HDMI connections via a SC61E switcher scaler to the projector + screen.

Needs control provides an intuitive interface for room control and the iRoom iDock provides a framework for the iPad to control the room.

Audio playback is provided by 4 ALFC-406 ceiling speakers powered by an ALF-PA100V 40 watt, 100v line amplifier.
